```java
package org.wicket_sapporo.handson.beans;

import java.io.Serializable;

public class UserLunch implements Serializable {
        private static final long serialVersionUID = 1L;

        private String name;
        private String lunch;

        public UserLunch() {
                this.name = "";
                this.lunch = "";
        }

        public String getName() {
                return name;
        }

        public void setName(String name) {
                this.name = name;
        }

        public String getLunch() {
                return lunch;
        }

        public void setLunch(String lunch) {
                this.lunch = lunch;
        }

}
```
